

Cascos C4

Two Post Lift with Base

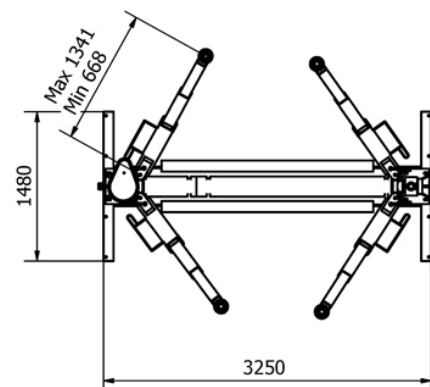

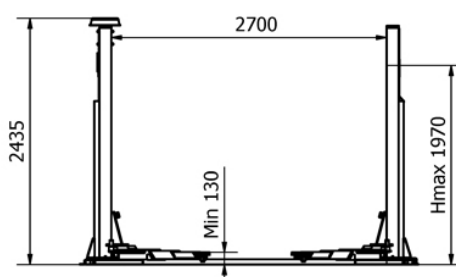

Based on the classic, but with an even bigger lifting capacity

The C4 Two Post Lift is, in our opinion, the best 2 Post Car Lift money can buy – and anyone who owns one will undoubtedly agree. It is true that no Two Post Lift is completely universal, i.e. there will always be some vehicles that you cannot fit on perfectly. However, the C4 is as universal as you will ever find, in our Two Post Lifts with Base range and in the industry.

The triple stage arms enable maximum scope for both short (where the pick-up points are close together) and long (where they are far apart) applications, and the sheer engineering supremacy means that even larger vehicles feel reassuringly safe on this lift. Overall, the C4 is one of those products where you tend to find once someone owns one, they won't go back to anything else.

KEY FEATURES

- High quality guided steel bearings
- The biggest diameter spindle on the market and high quality nuts offer less wear and longer lasting life
- Chain driver transmission integrated on the solid base

TECHNICAL DATA

- Lifting Capacity: 4 Tonnes
- Lifting time: 45 seconds
- Weight: 800 kg
- Motor Power: 3.7 Kw
