

CASCOS C4XL

TWO POST LIFT WITH BASE

Based on the classic, but with an even bigger lifting capacity and a wider distance between the columns

The Cascos C4 2 Post lift has, in our opinion, always been the best 2 Post Car Lift money can buy. The triple stage arms enable maximum scope, whether a vehicle's pick-up points are close together, or far apart, and the sheer engineering supremacy means that even larger vehicles feel reassuringly safe on this lift.

Now, the C4XL improves the options available to workshops further; with an extra 300mm space between the columns, this lift can accommodate much wider vehicles.

KEY FEATURES

- High quality guided steel bearings offer greater durability than nylon guides
- The biggest diameter spindle on the market and high quality nuts offer less wear and a longer life
- Chain driven transmission integrated on the solid base
- Special 'Slendertec' solid, non-deformable pillar profiles produce less bulky posts
- Maximum load capable at any opening angle or arm extension

TECHNICAL SPECIFICATIONS

- Lifting Capacity: 4 Tonnes
- Lifting time: 45 seconds
- Weight: 810 kg
- Motor Power: 3.7 kW
