

DT3600

FULL HEIGHT SCISSOR LIFT

The Cascos DT3600 recessed full-height scissor lift has a universally accommodating **3600kg capacity**. The clever telescopic extending platforms enable longer wheelbase vehicles to be mounted, making this lift one of the most diverse scissor lifts of its kind.

Manufactured 100% in Spain, this lift is exceptional quality and construction, accompanied by a class leading warranty.

KEY FEATURES

- Extendable platforms for greater vehicle coverage
- Robust structure
- Protective photocell integrated into the scissors
- Larger diameter hydraulic cylinders operate at a lower pressure
- Pneumatic-mechanical and hydraulic safety locking
- Three phase operation
- Recessed installation only
