

MEGAPACK 1

TYRE PACKING MACHINE

The megapack 1 tyre packing machine provides a new concept for packing and storing used, worn tyres ready for disposal, saving your business time, space and money.

It quickly and efficiently fits two tyres together, one inside the other, creating a neat package of two tyres, using around half the space previously required to store and transport worn tyres for disposal. Your business will save used tyre storage space, time loading those tyres onto transport and money in transportation costs.

KEY FEATURES

- Easy to use, simple but robust machine
- Fits one tyre inside another, reducing storage and transportation space by circa 50%
- No electrical power is required – operates on compressed air
- 12 months parts and labour warranty

SPECIFICATIONS

Height:	1200mm
Width:	600mm
Length:	2470mm
Weight:	106kg
Air supply pressure:	9 bar (@ 670l/cycle)
Max floor slope (stable work):	3°
