

MEGAMOUNT 704XL

TYRE CHANGER

The Hofmann Megaplan Megamount 704XL is a heavy-duty tyre changer designed for the demands of modern, high-volume workshops. Built to handle low-profile, run-flat and ultra-high-performance tyre applications, it combines robust construction with precise control and advanced twin flange rim clamping.

With an external clamping capacity from 10" to 24", the 704XL provides the strength and stability required for today's increasingly complex wheel assemblies. At its core is the Twin Flange Turntable system, engineered to optimise clamping force distribution and reduce wheel slippage during operation. Supported by a hand-operated bead breaker system, dual assist arms, and a range of practical workshop features, the Megamount 704XL delivers consistent, efficient performance in demanding working

KEY FEATURES

- Revolutionary Twin Flange Design of turntable giving unparalleled distribution of clamping force
- Twin "Duo Pro" assist arms
- Hand operated (2 button) bead breaker control
- 1PH (variable speed) motor as standard
- Triple lock for horizontal arm
- Foot pedal operated inflator
- Robotic pipe control for hex bar

SPECIFICATIONS

Outside clamping capacity	10" - 24"
Inside clamping capacity	12" - 26"
Max. tyre diameter	1100mm (43")
Max. tyre width	400mm (15")
Force of bead breaker (10 bar)	8 bar -10bar (116-145psi)
Inflating device pressure Max.	3.5 bar (50psi)
Power supply	230V 1ph /400V 3ph
Packing size	1044mm x 1000mm x 170mm
N weight	300kg STND, 320kg GT
Noise level in working condition	<70dB(A)
