

megaspin 420

Super Automatic 3D Data Input Wheel Balancer

The Megaspin 420 is without doubt the most advanced wheel balancer ever produced. The combination of revolutionary new technology, incredible simplicity, and typical Hofmann Megaplan reliability make this, in our opinion, the best value wheel balancer on the market today.

NOW WITH ONE WEIGHT BALANCE

By having a laser 'pinpoint', our revolutionary new software enables the operator to accurately balance a wheel using just one weight! Traditionally, 'static' balancing could only determine the approximate position on the rim, but now we can use laser accuracy to identify the exact lateral position across the rim to place the weight in order to eliminate dynamic as well as static imbalance!

Specifications

Max. Wheel Weight:	70kg
Max. Wheel Diameter:	1200mm
Max. Wheel Width:	530mm
Rim Diameter:	10"-30"
Rim Width:	1.5"-20"
Revolutions:	100rpm
Max. tyre width:	16" (415mm)
Power Supply:	115-230V/50/60Hz / 1Ph/500W
Gross Weight:	123kg
Packing Dimensions:	W660mm x D960mm x H1160mm
