

LUXUS HML40

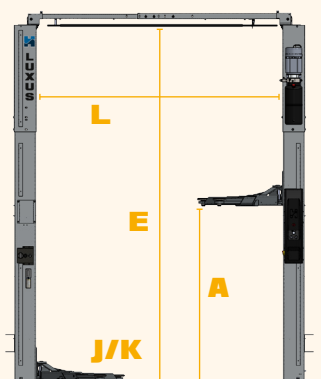

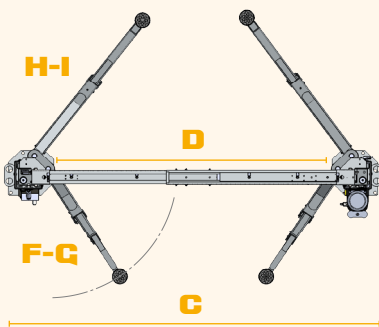

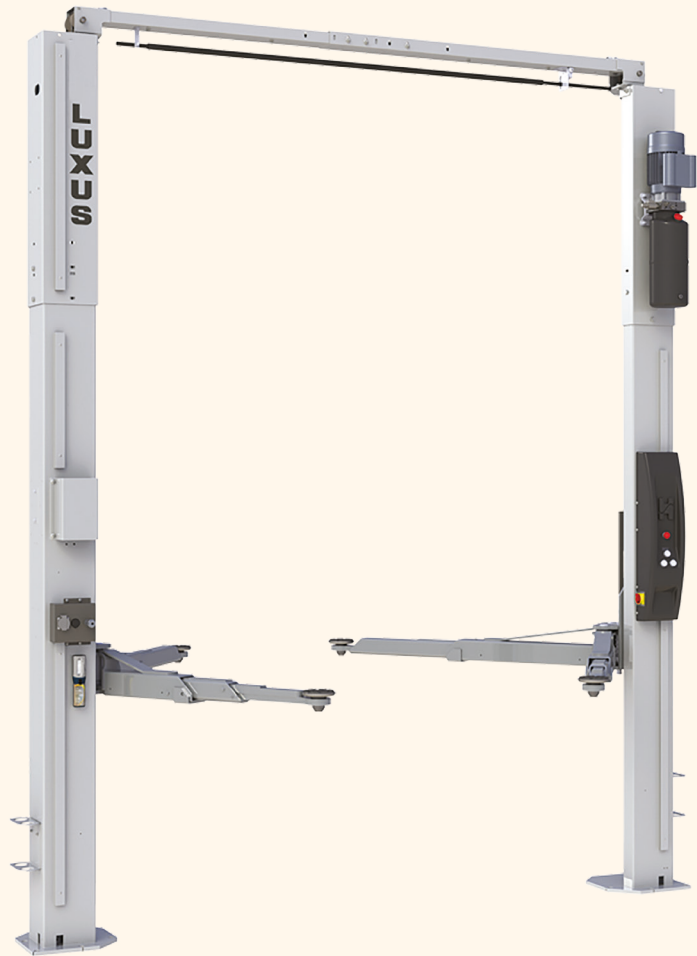

EXCEPTIONAL QUALITY TWO POST LIFT

Electric locking mechanism, 4 ton capacity

The Luxus range has raised the bar even further, representing our line of what we call 'US Style' models. Our US counterparts have been selling this range for many years, thus they are proven and highly regarded right across North America. Capitalising on this success, we have adapted them for the European market in order to present a class-leading range of lifts designed for those customers where, quite simply, only the best will do.

KEY FEATURES

- Highest quality Italian solenoid valves used throughout
