

LUXUS HML85

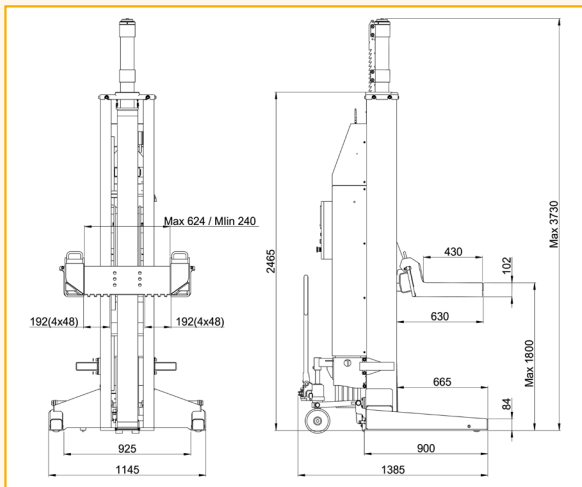

COMMERCIAL VEHICLE COLUMN LIFT

A wirelessly connected, cable-free commercial vehicle mobile column lift.

The Luxus HML85 is a battery-powered, cable-free mobile column lift system, with each column boasting an 8,500kg lifting capacity. Capable of being configured in 2 to 16 column systems, this versatile lifting solution makes the challenge of lifting a wide range of vehicles simple. An advanced auto-speed system, effective during lifting and lowering ensures optimal synchronization of all columns during these phases.

KEY FEATURES

- 8,500kg capacity hydraulic column lift system
- Bluetooth wireless connectivity allows synchronised lifting from up to 16 columns, from a single control pad
- System can be operated from any chosen column
- Control panel with LCD colour touch-screen, integrated with user-friendly interface
- Cable-free 24V electric-hydraulic driven column design
- Double safety system with hydraulic flow control and mechanical locking mechanism
- Unique cushioning technology limits column shake and rock
- Adjustable lifting forks adapt to various wheel sizes
- Built-in hydraulic pallet truck style wheel unit for ultimate manoeuvrability
- Reassuring 3 year warranty subject to T&Cs

TECHNICAL SPECIFICATION PER COLUMN

Lifting capacity	8,500kg
Max. height lifted	1800mm (70.9")
Lifting time	90 seconds
Lowering time	80 seconds
Motor power	2.2kW
Cycles per charge	15
Charging power supply	220V/230V - 1PH
Weight	800kg
